// TECH STACK

Programming Languages

Python, Swift, C, C++, HTML, CSS

Core Concepts

Problem Solving, Data Structures, Logic

Tools & Platforms

VS Code, GitHub, MS Word, Excel

// EDUCATION

2024 – Present

BS Software Engineering
The University of Lahore
CGPA: 3.84 / 4.00

2023 – 2024

Intermediate (ICS)
PGC Gujranwala (88% Score)

2021 – 2022

Matriculation (Computer Science)
Science Locus School (97% - Topper)

Easha Akram

• Software Engineering Student • Aspiring Software Intern

01 PROFESSIONAL SUMMARY

Motivated BS Software Engineering student at the University of Lahore with a strong academic foundation (CGPA 3.84) and hands-on experience in tech event organization. Eager to apply programming knowledge in Python, Swift, and C++ alongside core technical projects to enhance skills through a software internship. Passionate about problem-solving, continuous learning, and building structured applications.

02 FEATURED PROJECTS

DSA Visualizer — Web-Based Data Structures Visualizer

An interactive web application designed to visually demonstrate various Data Structures and Algorithms. Built to help students and learners understand complex sorting and searching mechanisms through dynamic UI rendering.

Tech Stack: HTML, CSS, JavaScript

Event Budget Management — Console Application

A robust financial tracking system tailored for university and society events. Features expense categorization, automated total calculations, and budget forecasting reports to streamline event logistics.

Tech Stack: C++

Signup Login System — Mobile Authentication App

A secure and responsive mobile user authentication module featuring input validation, account registration, and secure login states designed for iOS environments.

Tech Stack: Swift, Xcode

Handwritten Digit Recognition — Machine Learning Tool

An intelligent image classification script trained to recognize and categorize handwritten digits accurately using machine learning algorithms and dataset processing.

Tech Stack: Python, Scikit-Learn

03 EXTRACURRICULAR & LEADERSHIP

Member — Society of Computer Science and Software Engineering

University of Lahore | 2024 – Present

- Organized major tech events including Olympiad 5.0, ICACS, and Batch Quest.
- Collaborated with teams for planning, promotion, and execution, enhancing leadership & communication.
